

Practical flooring for cold spaces

Walk-in cooler and freezer flooring can contribute to the longevity of your equipment and the safety of your staff. The wrong walk-in cooler floor can make it difficult for staff to access stored food; a challenge to move inventory in and out, and can even create serious damage to the floor beneath the cooler. Protect-All® flooring and Protect-All Rapid Weld™ make an ideal flooring system for walk-in coolers and freezers.

Protect-All flooring is:

- Durable.
- Slip-resistant.
- Non-porous and non-absorbent.
- Resistant to stains, odors and fluids.
- Easy to clean – can be maintained with a deck brush and squeegee.
- Quick and easy to install.

When combined with the fast installation and outstanding quality of Protect-All Rapid Weld, the finished product provides a functional flooring solution that will contribute to the lifetime of your walk-in cooler or freezer.
