

Interlocking Tiles

The Protect-All interlocking tiles simply link together for a quick and easy DIY installation. Tiles are available in all color with a matte or gloss finish.

Interlocking Tile Recommendations

- No adhesive or welding is required
- Each tile is 18" x 18" or 2.25 sf
- Add 7 – 10% material in rooms over 100 sf for edge trimming
- Allow a ¼" gap at the walls for expansion and contraction
- Begin tile installation from the center of the room
- Cut-offs from one side of the room installation (up to 9") can be used on the opposite side to maximize material
- Use a rubber mallet (wrapped in clear packing tape) to help lock the tiles into place
