About Protect-All Flooring

Manufactured by Oscoda Plastics®, Protect-All flooring derives its durability from the specialized thermal fusion process that blends remnant industrial-strength vinyl together into one monolithic piece. Oscoda Plastics has recycled more than 40 million pounds of vinyl waste into Protect-All, keeping it out of our nation's landfills. In 2020, Protect-All introduced Protect-All Designer Series®, a new multicolor flooring product available in multiple sizes. This new product offering has helped Protect-All win market share in both residential and commercial flooring applications.
