NEW COLORS ADDED TO PROTECT-ALL® SPECIALTY FLOORING PRODUCT LINE

*OSCODA, MICHIGAN --- Terracotta and Charcoal are the latest colors Oscoda Plastics®, Inc. has recently added to its **PROTECT-ALL® Specialty Flooring** product line. **PROTECT-ALL Specialty Flooring** is an environmentally-friendly, slip-resistant flooring that offers stain and impact protection for areas exposed to water, heavy-traffic patterns, and extreme weight loads.*

According to John Rouse, Oscoda Plastics national sales manager, the new colors offer more design options and expand the number of possible applications to include retail and commercial entryways, dining area flooring, and offices.

***PROTECT-ALL® Specialty Flooring** does not contain fillers and is made from recycling remnant vinyl used in the roofing and automotive industries. It is available in eight colors, varying sheet sizes and thicknesses, with matte or texture top surface finishes.*

***PROTECT-ALL** also comes in interlocking and square tiles.*

*Oscoda Plastics, Inc. is a fast-growing manufacturer specializing in the production of environmentally- friendly recycled building products. The leading recycled vinyl flooring manufacturer, Oscoda Plastics recycled over six million pounds of vinyl in 2006 in order to produce **PROTECT-ALL Specialty Flooring** and **PROFLEX® Vinyl Expansion Joints**, which are used in the construction industry.*

For more information about Oscoda Plastics' product lines, go to their new website at: www.oscodaplastics.com.
