FOR IMMEDIATE RELEASE

Protect-All® Flooring Introduces Groundbreaking Installation System

Oscoda, Michigan – February 6, 2014 - PROTECT-ALL® Commercial Flooring, is pleased to announce the introduction of Protect-All Rapid Weld™, a groundbreaking installation system that significantly reduces installation labor.

Faster and easier than heat welding, Protect-All Rapid Weld delivers a waterproof solution designed to support a range of rigorous tasks. This new installation system developed exclusively for Protect-All flooring products, utilizes a chemical welding process that dries fast and enables installation and welding on the same day.

“Protect-All Rapid Weld provides a competitive cost advantage by reducing installation time and the amount of required labor,” said Jerry Lee, Protect-All Sales Manager.

Together Protect-All and Protect-All Rapid Weld can reduce flooring seams by at least 80 percent versus 6-inch square ceramic or quarry tile. Few seams eliminate the need for regular and costly re-grouting and reduce the threat of bacteria growth.

Manufactured in Oscoda, Michigan by Oscoda Plastics, Inc., PROTECT-ALL Commercial Flooring derives its durability and slip-resistance from the specialized thermal fusion process that blends remnant industrial strength vinyl together into one monolithic piece. Oscoda Plastics, Inc. is a fast-growing manufacturer specializing in the production of

environmentally-friendly building products. As the leading recycled vinyl flooring manufacturer, Oscoda Plastics has recycled over 40 million pounds of vinyl waste into PROTECT-ALL, keeping it out of our nation's landfills. For more information regarding the new Rapid weld system, please contact Jerry Lee at 800-544-9538 or visit www.protect-allflooring.com.
