

Worry-free flooring so you can focus on business

Protect-All® Flooring is a great option for many areas in retail areas, from small stores to applications within large malls and shopping centers.

Food courts located on the second or third floor of a mall can be a potential disaster to tenants located below if there is plumbing or equipment failure. But because Protect All Flooring is watertight when welded and has an integral base system, it can eliminate those worries.

In addition, Protect-All Flooring offers:

- Slip resistance, which can provide safe footing and a cushion for child safety in play areas.
- Comfort underfoot to reduce leg fatigue and increase worker productivity.
- Resistance to grease, animal fats, chemicals, fire, mildew and bacteria growth.
- Slip resistance for safe footing.
- No sealers or grout to maintain and repair.

When combined with the fast installation and outstanding installed quality of Protect-All Rapid Weld™, the finished product can be used in a wide variety of areas within retail stores.
