

STADIUMS AND ARENAS

Stadiums and arenas demand a flooring solution that can handle the toughest conditions, from high-impact, heavy loads to nonstop foot traffic. Protect-All® vinyl flooring is engineered to meet these rigorous demands, with a durable, monolithic construction that endures diverse weight loads, rolling equipment and temperature extremes throughout the facility.

Concert Stadium

Designed to resist dents and punctures, Protect-All provides a comfortable yet resilient surface that stands up to frequent impact, making it ideal for concessions, locker areas and main walkways.

With its nonporous construction, Protect-All effectively manages spills and bodily fluids, preventing stains and odors even after repeated cleaning. The flooring also absorbs sound, promoting a quieter environment within busy stadiums. Its high traction rating, certified by the Floor Safety Institute, helps boost footing confidence, enhancing safety in high-traffic and spill-prone zones. Resistant to chemicals, mildew and bacteria, Protect-All supports hygiene standards and, being crafted from more than 90% recycled materials, also promotes sustainable practices by diverting significant waste from landfills each year.

Dugout

Opting for durability doesn't mean compromising on design. Protect-All offers endless opportunities for customization with our Designer Series line of flooring solutions, so you can have a floor that looks as good as it performs.

Quality Surpassing Quarry Tile

While quarry tile has a long history of use, exploring alternative options might reveal more cost-effective and improved solutions. Protect-All's larger sheet sizes help reduce the number of grout lines when compared to quarry tile, which can reduce costs with routine maintenance.

Ice Rink

Loading Dock

Outperform Epoxy

Protect-All stands the test of time without showing wear because it is made of 100% heavy-duty vinyl, meaning there is no wear layer. Along with having less routine maintenance costs, its unique formulation stands up to the most commonly used disinfectant products.

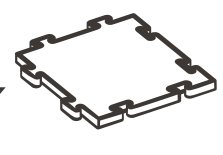

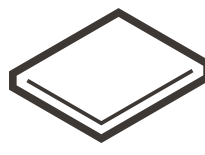

Sizes

5' x 8'
Sheets

5' x 5' & 2' x 2'
Tiles

5' x 30'
Rolls

18" x 18"
