

1. PROTECT-ALL® FLOORING

Thickness: 1/4"

Finish: Matte

A durable, vinyl floor that eliminates the need to regrout tile or recoat floors.

2. ADHESIVE

PA-295 Urethane Adhesive

A two-part adhesive engineered to securely bond the flooring to the substrate.

3. INTEGRAL COVE BASE

Cove base that extends the material up the wall to form a sanitary cove radius.

4. PROTECT-ALL RAPID-WELD™

Vertical Corner Seam

Chemically bonds joining pieces of flooring to ensure a continuous, watertight perimeter.

5. PROTECT-ALL RAPID-WELD

Flash Cove Boot Seam

Chemically bonds an integral cove base boot to the floor.

6. E6100® SEALANT

Seals penetrations and terminations to prevent moisture intrusion.

7. DRAIN RINGS

Finish: Stainless-steel

Protects floor termination points and mechanically fastens flooring to the substrate.

8. TRANSITION STRIPS

Finish: Stainless-steel

Provides edge protection at elevation changes and serves as a mechanical fastener.

9. Z-BAR

Finish: Stainless-steel, Aluminum or PVC

Protects the top edge from impact damage and mechanically fastens cove base to the wall.

10. CORNER GUARDS

Finish: Stainless-steel

Shields high-traffic edges and external corners from heavy impact.
