NOW AVAILABLE BY PROTECT-ALL® CUSTOMIZABLE RESILIENT FLOORING COLOR OPTIONS

OSCODA, Mich. – Protect-All Flooring announces new customizable options featuring more colors and endless fleck combinations. Designed to bridge the gap between functionality and aesthetic appeal for resilient flooring, Protect-All Designer Series® now offers eight new fleck colors: red, tan, orange, terra cotta, yellow, mint green, green and light blue. These flecks can be featured on any of our eight Classic Series base colors. Customers can now choose from a selection of our most popular color combinations or completely customize their flooring product by mixing and matching base and fleck colors to get the perfect combination for their unique needs.

Crafted from more than 90% recycled materials, Protect-All withstands high-traffic areas without showing excessive wear, is designed to boost footing confidence in slip-prone areas and provides comfort underfoot. The ¼" thick Protect-All flooring system is available in 5'x 8' sheets, 5'x 5' and 2'x 2' tiles as well as 18"x 18" interlocking tiles.

"At Protect-All we strive to provide our customers with the best resilient flooring solutions and service," said Jerry Lee, Protect-All Flooring National Sales Manager. "Our Designer Series has been well received in the industry since its launch in 2020. We are delighted to now offer new colors and customization options to our loyal customers to open up new application opportunities."

###

About Protect-All Flooring

Manufactured by Oscoda Plastics®, a brand owned by Holcim Solutions and Products US, LLC, Protect-All flooring derives its durability from the specialized thermal fusion process which blends remnant industrial-strength vinyl together into one monolithic piece. Oscoda Plastics has recycled millions of pounds of vinyl waste into Protect-All, keeping it out of our nation's landfills. In 2020, Protect-All introduced Protect-All Designer Series which was designed to bridge the gap between functionality and aesthetic appeal.
