## **Protect-All® Flooring Adds New Color Option to Rapid Weld™ System**

**OSCODA, MICHIGAN** — Protect-All flooring is pleased to announce the addition of the color blue to the Protect-All Rapid Weld System, a groundbreaking installation system that significantly reduces downtime and installation labor.

“Rapid Weld colors are formulated to match our flooring panels precisely, creating a finished product that is aesthetically appealing and functional,” said Protect-All National Sales Manager Jerry Lee. “This new color provides installers additional opportunities to design flooring projects that utilize the Rapid Weld System.”

Protect-All Rapid Weld utilizes a chemical welding process that significantly reduces the amount of required labor and creates a watertight seal between flooring panels. This innovative process can reduce downtime and flooring seams by 80 percent versus 6-inch square ceramic or quarry tile. Fewer seams eliminate the need for regular and costly re-grouting. Protect-All Rapid Weld is currently available in brown, light gray, dark gray, black, terra cotta and blue.

### **About Protect-All Flooring**

Manufactured by Oscoda Plastics®, Inc., and certified as a “High Traction” product by the National Floor Safety Institute, Protect-All flooring derives its durability and slip-resistance from the specialized thermal fusion process that blends remnant industrial-strength vinyl together into one monolithic piece. Oscoda Plastics has recycled over 40 million pounds of vinyl waste into Protect-All, keeping it out of our nation’s landfills. In 2014, Protect-All introduced Protect-All Rapid Weld™, a groundbreaking installation system that significantly reduces installation labor.
